

HONEY AND BEE DERIVATIVES

COMPANY

BeeCo., a brand dedicated to the sustainable production of high quality honey and bee products, was born in the Brazilian Cerrado and Pantanal.

Cerrado: Covering 13 states in an area of 200 million hectares, it is the richest savannah in the world and the second largest Brazilian biome.

Pantanal: The largest floodplain on the planet and the smallest Brazilian biome. The Pantanal is home to exuberant nature with species that only exist there.

BeeCo. adopts sustainable practices that ensure production does not harm the environment or the bees, proving that it is possible to produce in total harmony with nature.

PRODUCTS

BeeCo. takes transparency seriously throughout its production chain. The brand prides itself on its 100% Brazilian origin and its involvement with local communities in the Cerrado and Pantanal. BeeCo. products are unique, come from a specific region of Brazil and tell a beautiful story through their unique flavor and quality.
