produce trading

FRUITS AND VEGETABLES

COMPANY

Fresh Quality supplies fresh fruits and roots to importers in North America, Europe, and the Middle East. It was created in 2018, by the agronomic engineer Gideão Guilherme, who saw a good opportunity in the market. In 2019, along with Gabriel Bonancin's entry into the partnership, a digital and business model transformation began, which went from commercial representation to trading.

Today, with a Packing House, a skilled team, and vast technical knowledge, the company buys from rural producers in 8 Brazilian states and performs its own processing, ensuring better quality in its products, thus increasingly building its brand globally.

PRODUCTS

Our products come from highly qualified producers, from the best producing regions in Brazil, following the best agricultural and social practices. Our commitment to quality goes from the field to the final destination. With technical expertise and the use of multiple technologies, our team is always working to increase the overall quality and service life of our products. The use of refrigerated trucks, cold chamber, treatment of biological products, and innovative packaging are just a few examples of how we are able to satisfy our customers with excellence.
