

FRUIT AND VEGETABLES

COMPANY

With 28 years of experience in agribusiness, S.A. Agropecuária has built a solid track record, starting with operations in the national and international mango markets. Throughout this period, it has consolidated knowledge, tradition, and credibility, developing a broad vision of production, commercialization, and market relations.

Currently, the company focuses its operations on the production of lemons for the Brazilian market and has the structure and experience to resume its export operations. With a focus on quality, regularity, and supply security, S.A. Agropecuária is prepared to establish solid and lasting commercial partnerships, meeting the demands of different markets with confidence and professionalism.

PRODUCTS

NCM 0805.50.00

Produced in the Brazilian Northeast, our fruits are grown in a region favored by favorable climatic conditions, high solar incidence, and soils suitable for high-quality agriculture. This natural combination, along with the use of modern technologies and responsible management practices, results in fruits that meet the standards and requirements of the most competitive markets.

Our production occurs throughout the year, providing regularity, predictability, and supply security. To achieve this, we rely on efficient irrigation systems, the use of solar energy, and biological management technologies, promoting more sustainable production aligned with current market demands.

By combining productivity, quality, and conscious use of natural resources, we are prepared to offer a continuous and reliable supply, always focusing on product excellence, sustainability, and the strengthening of lasting commercial partnerships.

DETAILS ON PRODUCTION CAPACITY, SEASONALITY AND OTHER CHARACTERISTICS:

With the planned expansion of cultivation areas, we project to double our production capacity in the next three years. This growth will allow us to increase our service capacity and strengthen the regularity and security of supply, both for the national and international markets, keeping pace with new commercial opportunities and growing demand.
