

## COMPANY

Skarlata Chocolates was born from a dream: to produce the best healthy, natural and, above all, tasty chocolates using fine cocoa from the Amazon. Our aim is also to target those with dietary restrictions on gluten, CMPA, lactose and sugars.

We have chosen to use only the highest quality products in the composition of our chocolates, thus providing greater comfort and reliability when consuming them.

We use almonds produced by the agroforestry system, bringing sustainability to the entire production chain and bringing incredible flavors to our Bean To Bar chocolate.

## PRODUCTS

Our chocolates are made with carefully selected fine Amazonian cocoa, taking into account the distinct characteristics and flavors of regional cocoa.

In addition, all our products are gluten and lactose free, with no added flavorings, preservatives or hydrogenated fats. Thus, we ensure that the unique flavors found in each micro batch of cocoa beans are preserved.

We work to offer our customers the highest quality products, respecting the origin and characteristics of cocoa from the Amazon region.
