

## COMPANY

Amazônia Smart Food was founded with the purpose of valuing the socio-biodiversity of the Amazon through the sustainable transformation of regional fruits into high-value-added superfoods. It operates in the functional and healthy food sector, using ultra-freezing, vacuum, modified atmosphere, and freeze-drying technologies to preserve nutrients and reduce waste.

The company was born from the connection between science, innovation, and local communities, promoting low environmental impact and income generation in the forest. Today, it positions itself as a reference in the Amazonian bioeconomy, bringing natural and traceable products from the Amazon to the national and international market.

## PRODUCTS

**NCM 0811.90.00**

Amazônia Smart Food produces freeze-dried superfoods such as Tucumã, Açaí, Buriti, Cupuaçu, Cumarú, and Guaraná, employing sustainable freeze-drying technology that preserves up to 98% of the nutrients, as well as the natural flavor and aroma of Amazonian fruits, with low energy consumption and reduced environmental impact. Their products have a long shelf life without the need for preservatives, making them ideal for export and for applications in the food, cosmetics, and nutraceutical industries.

The brand stands out for its traceable origin, low carbon footprint, and appreciation of Amazonian socio-biodiversity through partnerships with local communities, promoting fair trade and regional development. Combining technological innovation, sustainability, and positive social impact, Amazônia Smart Food transforms native fruits into high-value-added superfoods, aligned with the most rigorous international quality standards, consolidating itself as a benchmark in functional and sustainable foods from the Amazon for the world.

## DETAILS ON PRODUCTION CAPACITY, SEASONALITY AND OTHER CHARACTERISTICS:

The industrial plant is located in a complex of over 12,000m<sup>2</sup>, with more than 500m<sup>2</sup> of storage, its production capacity is 15 tons per month, the planted areas are located in more than 24 agro-extractive communities in 4 Brazilian states, totaling more than 524,000 hectares preserved, guaranteeing productive autonomy, social inclusion and regularity of supply of raw materials and finished products.
