

COMPANY

Fazenda São Pedro is a project focused on the large-scale production of specialty coffees, initiated in 2019 with the purpose of combining quality, sustainability, and production efficiency. Located near the Serra da Canastra mountain range, with areas in Tapira and Medeiros, in the Cerrado Mineiro and Canastra regions respectively, recognized for their potential for high-quality coffee.

The company invests in technology, traceability, and responsible agricultural practices. With a strong presence in the international market, it seeks to offer consistent, certified, and competitive coffees, building solid and long-term commercial partnerships.

PRODUCTS

NCM 0901.11.10

Fazenda São Pedro is dedicated to the production of specialty coffees, focusing on superior quality, production scale, and sustainability at every stage of the process. We work with different processing methods, such as Natural, Honey, Pulped Natural, and controlled fermentations, in addition to cultivating different varieties adapted to the characteristics of the region, guaranteeing distinct and consistent sensory profiles.

Our crops are located between 1,200 and 1,330 meters above sea level, a condition that favors the development of denser, more complex, and higher-quality grains. We combine cutting-edge agricultural technology, comprehensive traceability systems, and low environmental impact practices, backed by internationally recognized certifications such as Rainforest Alliance, 4C, and Regenagri.

Our key differentiator lies in the combination of consistent quality on a large scale, competitive volume, and efficient logistics capabilities, ensuring a reliable supply for both the domestic and international markets. We offer a diverse portfolio of processes and varieties, always aligned with the demands of the global market and the highest standards of excellence.

After a thorough search for the ideal location to begin cultivation, the choice of the Cerrado Mineiro region proved to be strategic. The municipality of Tapira, located in the Serra da Canastra region, offers ideal climatic and geographical conditions for the production of specialty coffees, establishing itself as the perfect setting for the development of the São Pedro Farm project.

DETAILS ON PRODUCTION CAPACITY, SEASONALITY AND OTHER CHARACTERISTICS:

Annual capacity of 25,000 bags; specialty coffees with traceability and international certifications.
