

COMPANY

Certified organic pecan production in southern Brazil that is based on regenerative agriculture without using synthetic and agrochemical fertilizers. The trees are kept in a natural environment surrounded by sheep farms.

Our farm is based in Encruzilhada do Sul in southern Brazil, where organic, healthy and nutritious pecans are produced according to agricultural best practices – focused on continuous, efficient and shared value production.

PRODUCTS

NCM 2008.1100

Our organic production of pecans adhere to the most stringent global standards for organic and biological production, including:

BR – Law 10.831/2003 (Organic Agriculture)
EU – CE 834/2007 and CE 889/2008
US NOP Standard
Bio Suisse

We've placed sustainability at the heart of our business and have adopted the best agricultural, social and environmental practices.

Our farms are free from synthetic and agrochemical fertilizers and conform to international standards related to organic production. Certified organic in-shell or shelled pecans, medium size, packed according to the requirements of customers. Vacuum or modified atmosphere packaging also available.

DETAILS ON PRODUCTION CAPACITY, SEASONALITY AND OTHER CHARACTERISTICS:

We will have samples in **July of 2021**, with commercial production of around **3,000kg** in-shell or **1,500kg** shelled in 2022.
