

SPECIAL ORGANIC FLOURS

COMPANY

We are a small company that started from a dream of producing healthy food, rescuing our Brazilian food culture with a regenerative production. We started in 2019 with a production of PANC in agroforestry, since the beginning focused on the processing in small agroindustry to add value in these foods.

TERRAMANA
It is one of the guardians who work in the rescue of this abundance of the Earth and in the resumption of a conscious and sustainable production aligned with the nature cycles.
