COCONUT PRODUCTS

COMPANY

Located in the heart of an extensive coconut plantation in the state of Paraíba, the Coco Do Vale factory is a model of sustainability and production efficiency.

In addition to providing products made with the best quality raw material to all of Brazil, it also meets the demand of other countries in the Americas and Europe.

Our coconut water is filled with TETRA PAK technology-aseptic packaging that protects the product from exposure to light and oxygen, preserving the taste and nutrients of the fruit.

PRODUCTS

COCONUT IS ONE OF THE MOST SYMBOLIC FRUITS OF BRAZILIAN CULTURE. Our work is to extract the best of this beautiful raw material, with a high standard of quality and maximum respect for nature and our consumers.

Coco Do Vale has a policy of caring for the environment, acting with the reuse of organic material from the Coconut Grove itself, in order to protect the plantation from plant pests, with a very reduced need for pesticides. This is very important in the sense of keeping the soil free of erosion and protecting its natural riches.

They are part of our portfolio: coconut water, grated coconut, coconut milk, coconut oil.
