

COMPANY

Fazenda Domingo E Rodrigues emerged from a business group that was already well-established in Brazil. The group has a culture of innovation, technology and expansion, so agribusiness has always been on the agenda.

With this in mind, the farm began operating in 2021, seeking to be more than just a table grape producer, but a company committed to sustainability and well-being, cultivating not just grapes, but values that are reflected in each bunch. In order to be a successful idea, the group constantly invests in innovation and technology, seeking to improve its processes and products.
