

## HONEY AND BEE DERIVATIVES

### COMPANY

Mel Zen (Zen Honey) found the perfect setting for working with bees in the forests of the Pantanal, a region blessed with pure water springs and flowers that produce a product with unparalleled quality. We are geared towards a sustainable life way of life, given that the raw material of our work depends directly on the preservation of the forests.

We work in an environment teeming with unique flowers that translate into the flavor, aroma and textures that are unique to our products, the Pantanal terroir.

### PRODUCTS

NCM 04.09.00.00

Our products are the outcome of this experience, exclusive, delicate, yet strong in their roots.

We have specific flowering:

#### Cipo-uva honey:

A quality, thick, extremely smooth translucent honey, its origin can be traced to a vine used since ancient times by indigenous peoples.

#### Wild Honey:

Soft nectar, perfect for daily consumption, includes a rich and varied mixture of forest flowers

#### Eucalyptus Honey:

Full-flavored honey boasting intense therapeutic properties.

Our honey does not go through any pasteurization process. It is harvested from the hives, filtered, decanted and bottled as efficiently and naturally as possible. From the forest to your table!

### DETAILS ON PRODUCTION CAPACITY, SEASONALITY AND OTHER CHARACTERISTICS:

In-house honey production capacity of up to **100 tons per year.**

Mato Grosso do Sul
