

COCOA AND CHOCOLATES

COMPANY

We are a family company and our main product is Cocoa. Our Cocoa is native from the Amazon floodplains, the difference is that it is not planted or cultivated in a planned way by man, it is the result of nature's action and managed by riverside families from the Lower Tocantins region.

Through cacao we elaborate varied products such as Fine Cacao Almonds and 100% cacao bars for several purposes. Besides products such as sweets, jellies, and cocoa liqueurs, cupuaçu, açaí, and other fruits from the biodiversity of the Para Amazon.

PRODUCTS

NCM 1803.20.00

Beyond extractivism, we offer community-based experience tourism packages with the proposal of bringing the poles, producers, and travelers closer together, showing the bioeconomy of the standing forest. Where the riverine person is the host, in an experience of cultural, gastronomic, and ecological immersion.

Cacauaré was born from the need to socio-economically develop our municipality of Mocajuba, and especially the productive area of Ilha do Tauaré, a property inherited by our father/spouse, victim of Covid-19 in 2020. We are the main actors in the end-to-end chain from the harvest to the final product.

We produce 100% Whole and Intense Cocoa Bars for culinary, chocolate and ceremonial use.

- Whole and Caramelized Cocoa Nibs**
- Amazon Granola Cocoa made with a mix of cocoa nibs, tapioca flour, Brazil nuts, and sesame seeds.**
- Cocoa candy marshmallow.**
- Cocoa syrup and liqueurs of: cocoa, cupuaçu, ginger.**
- Cocoa and cupuaçu jellies.**

The differential of our products is the raw material used in them, all our inputs are native from floodplain (cocoa and cupuaçu) inserted in agroforestry systems preserved and maintained by riverine farmers in the Lower Tocantins Region in Pará.

DETAILS ON PRODUCTION CAPACITY, SEASONALITY AND OTHER CHARACTERISTICS:

The production capacity of **400 products/month.**

Floodplain cocoa has two harvests throughout the year, from May to July (higher production) and November to January (lower production).
