

# EQUILIBRIUM PROBIÓTICOS

## NATURAL PROBIOTICS

### COMPANY

Once upon a time there was a free-spirited, open-minded couple, Angela and Kamil. Something present in their daily life was to maintain "balance between body and mind". During their research they discovered kombucha, "the elixir of immortality," an ancient home brew that Kamil had already tried in the former Czechoslovakia. Thus arises the idea of producing it to benefit everyone.

It couldn't be just another Kombucha. The goal was to create the tastiest and most authentic! In their vision, it was imperative to create healthy beverages with flavor, unmatched, natural ingredients of the highest quality, and their own culture of live bacteria.

### PRODUCTS

NCM 2101.20.20

The kombucha, naturally fermented, non-alcoholic, refreshing, flavorful beverage. It provides different benefits to the body. Fermented from hibiscus or green tea, considered a powerful natural probiotic. It contains millions of live lactobacilli, producing symbiotic action of bacteria and yeasts under controlled conditions. Symbiotic action of bacteria and yeasts under controlled conditions. Flavored with selected fruits and spices, it results in an alternative, healthy, natural, probiotic, and tasty beverage. Full of vitamins, enzymes, probiotics, and organic acids. In its composition there are beneficial bacteria for the intestinal balance, which stimulate the balance of the microbiota, protecting it from pathogenic bacteria and viruses. Assists in improving the immune system.

Improves digestion and bowel function. Helps in weight loss, aids in the digestive process. Strengthens the immune system. Source of probiotics. Rich in antioxidants. It reduces the risk of heart disease. Relieves "stuffiness" caused by a sudden change in diet - its consumption improves the sensation and quickly decreases the feeling of discomfort.
