COMPANY

Ximenes Consultorias Agronômicas operates in the production of mangoes and grapes, offering technical solutions for sustainable development in the field and specialized consulting to rural producers, assisting in management, productivity, and regulatory compliance.

In addition to its consulting services, Ximenes integrates its own grape and mango production with the technical knowledge applied in its projects, guaranteeing practical experience and consistent results. Its purpose is to strengthen regional agriculture through quality, innovation, and sustainability, contributing to a more competitive and conscious sector.

PRODUCTS

Excellent Mangoes and Grapes

Our production includes selected varieties of Palmer and Tommy mangoes, as well as Arra 15, Vitória, and Isis grapes, recognized for their superior flavor, texture, and quality standard. Each fruit is cultivated with meticulous attention to

sustainable agricultural practices and specialized technical management, ensuring that each stage of cultivation follows rigorous quality and environmental preservation criteria.

The entire production process is accompanied by complete traceability, offering security, transparency, and confidence to the consumer, from planting to final delivery. Our fruits benefit from privileged climatic conditions, which provide greater sweetness, intensity of flavor, and excellent visual appearance. This combination of quality, traceability, and productive excellence not only differentiates our products in the market but also reinforces our commitment to delivering premium fruits, cultivated with responsibility and dedication, to meet the most demanding consumer standards.

DETAILS ON PRODUCTION CAPACITY, SEASONALITY AND OTHER CHARACTERISTICS:

Production has a capacity of 88 tons per month, supported by complete infrastructure, including a packing house, cold storage, and efficient logistics that allow for the distribution of 2 to 4 trucks weekly.
