

## COMPANY

Founded in 2001, GeneSeas is a 100% Brazilian company, specialized in fish, located in the states of São Paulo and Mato Grosso do Sul.

Through the technique of responsible aquaculture, we participate in all the chains of tilapia production, from the production of the feed, to the processing and distribution. Thus, we guarantee the delivery of a quality product of origin to our commercial customers, such as the main retailers and food service.

## PRODUCTS

We have a portfolio of brands present in Brazilian homes, such as Saint Peters and Tilly, of tilapia and other fish and shrimp, and seafood DellMare, selected among the best world producers of each species. Outside of these products easily found in retailers, we have a number of items created from the demand of food customers. GeneSeas is the trusted choice that ensures quality and taste.

GeneSeas' environmental commitment is to prevent major damage, preserve the ecosystem, correct in real time actions that can cause environmental accident, and compensate for the impact we cause to the environment.

Animal welfare is also part of our work agenda. We carry out controlled management, which the only moment of direct human-fish contact is in vaccination, in order to avoid diseases outbreaks. Therefore, today we have the BAP (Best Aquaculture Practices) and ASC (Aquaculture Stewardship Council) seals.
