

COMPANY

In 2019, the company began marketing its extra virgin olive oils, quickly gaining international recognition.

Since the launch of its first product in 2019, Estância das Oliveiras has been building a trajectory of excellence and international recognition. With over 500 awards won since 2019, the brand has officially established itself as the most awarded olive oil in Brazil and the third most awarded olive oil brand in the world, a result that reflects the high standard of quality, dedication to cultivation, and permanent commitment to producing excellent extra virgin olive oils.

PRODUCTS

NCM 1509.20.00

The factors that differentiate Estância das Oliveiras olive oil are a unique terroir in the fields of Estância Grande in the city of Viamão, which produces complex olive oils that reach up to 12 flavor notes (a sensory explosion that adds value to haute cuisine dishes), followed by hard work

and dedication at every stage of the production process. From planting the olive trees, through the care of each tree, pruning, management, harvesting the olives (manual harvest to maintain the integrity of the olives), the time between harvest and extraction (only 2 to 3 hours), olive oil extraction, bottling (in packaging that maintains the quality of the olive oil), sales, and distribution.

We produce premium, 100% Brazilian extra virgin olive oils on our family olive grove in Viamão, Rio Grande do Sul. Our portfolio brings together different varieties and blends, with high sensory complexity and profiles for various gastronomic applications. The olives are harvested preserving their integrity and processed in just 2 to 3 hours, ensuring maximum freshness, aroma, and quality. While wonderful olive oils reach up to 7 flavor notes, our olive oils have surpassed 12 to 14 notes in world competitions with very high polyphenol and antioxidant indices. Estância das Oliveiras is currently the most awarded olive oil brand in Brazil and the 3rd most awarded in the world, with over 500 international recognitions and awards won on five continents.

DETAILS ON PRODUCTION CAPACITY, SEASONALITY AND OTHER CHARACTERISTICS:

We are in a production growth phase; in 2025, we produced 7,800 liters of olive oil, all super premium, and in 2026, we reached 21,000 liters. We have the capacity to supply olive oils with stability over the years, always respecting our focus and positioning geared towards niche luxury markets.
