

COMPANY

The rural property has a history spanning over 80 years, consolidated over generations with a focus on agricultural production. It operates in the cultivation of grapes, oranges and tangerines, maintaining operations focused on quality, consistent production and meeting market demands.

Throughout its history, it has adapted to the transformations in the sector and the evolution of agricultural practices, incorporating technical and operational improvements. Currently, the company is undergoing a diversification process, with the introduction of persimmon cultivation, combining traditional production methods with modern management techniques, prioritizing efficiency, sustainability, and strengthening its presence in the regional market.

PRODUCTS

We offer fresh fruit production consisting of common grapes, navel oranges, oranges destined for the juice industry, tangerines, and Kyoto variety persimmons. Grown on rural properties with a strong agricultural tradition, our fruits are produced following management practices suited to each crop and local conditions, ensuring high productivity and quality standards.

Production is geared towards visual quality, standardization, and regularity of supply, consistently meeting the demands of the consumer market. The fruits are intended for both fresh consumption and industrial supply, expanding marketing possibilities.

With extensive agricultural experience, we guarantee technical and practical knowledge of the crops, ensuring production stability and reliable supply. Diversifying the portfolio to include grapes, table oranges and oranges for industry, tangerines, and persimmons allows for greater commercial flexibility and adaptation to market demands.

Our production management focuses on operational efficiency, quality, and compliance with sanitary and commercial requirements, ensuring competitiveness and a solid position against smaller-scale producers or those with less regular deliveries.

NCM: 0805.10.00 - Navel oranges. NCM: 0805.10.00 - Juice oranges. NCM: 0805.21.00 - Bergamot/Mandarin. NCM: 0806.10.00 - Common grapes (not table grapes). NCM: 0810.70.00 - Kyoto Persimmon.

DETAILS ON PRODUCTION CAPACITY, SEASONALITY AND OTHER CHARACTERISTICS:

The estimated annual production comprises approximately 100 tons of Niagara grapes, 300 tons of Bahia oranges, 60 tons of oranges destined for the juice industry, and about 50 tons of tangerines, all predominantly aimed at the fresh market, ensuring a regular supply and a quality standard that meets commercial demands.
