

# COFFEE

## COMPANY

We are a specialty coffee micro-roaster located in Andradas, next to the Volcanic Region, in the south of Minas Gerais.

As a company, we start from the principle that our greatest value is to strengthen the local community, and so we are guided by a set of practices aimed at preserving the environment, responsibility towards society and corporate transparency.

Alongside the producers, we explore the mountains and plantations that surround us like someone looking for the best coffee. That's why our specialty is specialty coffees grown in volcanic soil.

## PRODUCTS

With the aim of promoting our region's coffees and bringing together buyers who are looking for high-quality coffees, we have started curating specialty coffees.

Aware that every step in this chain is decisive for the quality of the coffee, together with the producers we work on mentoring specialty coffees to guarantee quality control.

A selection of the best coffees produced throughout the harvest.
