

**JUICES AND PRESERVES
FROM FRUITS**

COMPANY

Pé de fruta is a genuine company from Paraíba, created in 2007 to supply the local market with natural and regional fruit pulps. Some years later, it increased its variety of flavors and started to expand to the market in other states. Today we have a varied line of fruit pulp, fruit creams, popsicles, and frozen fruit.

In 2007, around this time we were with our heads spinning thinking about how to make a pulp in a natural and healthy way... And we found out!

We were able to gather the best of the fruit, without adding artificial preservatives and dyes, pack it in a beautiful box, and deliver a product of the highest quality and incomparable flavor!
