

COFFEE

COMPANY

We are three generations of coffee producers. Our plantations are located in a mountainous region within the city of Illicínea in southern Minas Gerais. With an average altitude of 1,050 meters, we enjoy a climate and altitude that yields superb coffees. We work together as a family on production, and we've learned our passion for producing coffee from an early age.

Since 2019, we began to focus on producing specialty coffees and, in a joint effort with other producers, we founded ASCEMI (the Association of Specialty Coffees from the Illicínea Mountains) in order to empower and pave new paths for our coffee growing.

PRODUCTS

NCM 09.0111. 10

Family-farm produced coffee cultivated by hand in a mountain region boasting extreme beauty and featuring an altitude and climate that yield high-quality coffees. The coffee from our town has gained prominence in the coffee market, and this year hosted the BSCA Show Case event.

The care and diligence are passed down from generation to generation through family farming, resulting in high scoring coffee which has satisfied the most diverse palates in Brazil and throughout the world.

DETAILS ON PRODUCTION CAPACITY, SEASONALITY AND OTHER CHARACTERISTICS:

Considering that the properties are relatively small, the productive capacity averages **200 bags per year**.
