

COMPANY

Bonito has always been known for its crystal clear waters and unspoiled nature, and has always attracted tourists from all over the world. During the pandemic, there was the perception of the need for a product that had this similar characteristic, valuing the region's fauna and flora, allied to a totally Brazilian product: cachaça.

The idea came up due to the historical familiarity of one of the partners with the product, and the project took shape, improved, and reached the products we have today: pure cachaça, cachaças flavored with fruits and regional roots, aged cachaça, and liqueurs, all made without chemical additives or artificial coloring.

PRODUCTS

Besides the traditional cachaça, we also bottle the so-called "flavored cachaças", which is the tanning of the cachaça with fruits, roots, and seeds from the region, such as guavira (typical and seasonal fruit), nó-de-cachorro, mamica de cadela, among others. And for those who like a softer drink, we have options of liqueurs made from our cachaça.

The principle of DiBonito Cachaça is to value the culture and customs of the region, by flavoring the cachaças with fruits, roots, and seeds such as guavira, sucupira, and nó-de-cachorro, which are native plants of the state's biomes. The liqueurs are exclusive recipes of the brand. The cachaças are bottled in potted that pay homage to the city's main symbols, the blue-crowned Udu bird, the Blue Lake Cave, and the region's nature. This is a very significant beverage, as it carries with it the recognition of originality and the guarantee of a unique product, with differentials in quality and sustainability.
