

# SHRIMP

## COMPANY

Founded in 1983, we are one of the leading shrimp producers in Brazil. The shrimp from **Camanor** are farmed in the **AquaScience** system, a sustainable closed system production method. Our stringent traceability system ensures the texture and freshness of the products, right up to reaching their ultimate destination.

**Camanor** is certified for exporting, which is why our products are carefully selected, inspected, and produced according to the highest quality standards expected by the international market.
