

# COFFEE

## COMPANY

Since 1928, when our great-grandmothers founded Fazenda do Engenho, we have always worked with coffee. Grandma Estevam, a central figure in our history, left us in 2003. When my wife and I took over the farm and today we are counting on the help of our son Miguel who created the brand and has been striving to reach the world.

Since then, my parents have inherited part of the farm to look after, and that's where the second part of our story begins. My brother and I grew up there, and it's the coffee and all our parents' sweat and toil that gives us everything we have today. In 2020, we decided to pay tribute to this rich history by creating Café Pitangui, a name inspired by the micro-region where our farm is located, known for producing exceptional coffees.

## PRODUCTS

NCM 0901.11.90

In the mountains of Minas Gerais, at an altitude of 1,200 meters, we grow our Arabica coffees of the Mundo Novo, Catuaí, Arara, Rubí and Topázio varieties, among others. Using traditional and sustainable techniques, we respect the environment and local communities, reflecting our commitment to sustainability at every stage of production. Our coffee is delicious, ethical and responsible.

On our farm, we use 100% clean and renewable energy. We practice regenerative coffee growing, using a mix of plants that nourish the soil and make it stronger for generations to come. Furthermore, our coffee is free from glyphosate, a common agrochemical that is harmful to human health. We have FAIRTRADE and 4C certifications, guaranteeing that our coffee is grown with organic fertilizers and that pest control is carried out using biological methods. We also have the ABIC seal, ensuring that our coffee is pure, without adulteration or blending, reaffirming the quality of our beans.
