

JUICES AND PRESERVES
FROM FRUITS

COMPANY

100% Amazonia was born out of the belief that it was necessary to invest in the forest's biodiversity, generating income and opportunities for the people who make this environment their home. Specialists in bioingredients for industries, they present a portfolio of more than 55 products made with 28 Amazonian species.

Combining innovation with ancestral knowledge, they have created bridges between communities and companies, articulating the whole process, from the selection of partners to the delivery of products, which today reach more than 65 countries.

Today, after 13 years of operation, it is expanding the business with an industrial unit, created to use technology in the service of nature.

PRODUCTS

100% Amazonia specializes in sourcing renewable non-timber forest products from the Amazon rainforest and transforming them into unique ingredients for the food, supplement, beverage and cosmetics industry.

Among frozen pulps, concentrates and extracts, powdered superfruits, cold pressed oils and butters, and in natura products, we have as examples of products: frozen açai pulp, açai powder, guaraná powder, and copaiba oil.

All products are natural and minimally processed to maintain their original nutritional properties. Our quality management system is ISO 9001 certification.
