

COMPANY

Flores Comestível CG started selling flower kits during the pandemic times, bringing the information that there are species of flowers that are edible to anyone interested in trying them.

The idea kept growing and taking shape until there was a need to create high-quality by-products so that each person could have a great experience with this healthy, smelly, and differentiated food that we have always had.

Flores Comestíveis CG is a company that brings the conscious use of food with Flowers.

PRODUCTS

NCM 2007.99.10

There are 10 Flavors, 10 Experiences!

We decided to create 10 flavors of PREMIUM JELLIES completely different from each other and always keeping a lot of quality for a perfect experience when ingesting each flavor.

Our jellies have a rigorous quality control in which we follow the standard technical sheet and also use laboratory utensils to maintain a low level of Brix (sugar) and the perfect level of PH (acidity), ideal for the palate of any human being to feel pleasure when eating our products. Furthermore, we use natural pectin from the fruit to make it as healthy as possible for our bodies when eating it. Our flowers are grown for edible purposes, born and harvested in the Pantanal region and climate, making a food even more unique and differentiated from our region to the world!

**With Edible Flowers, (pantaneiro)
Brazilianess, innovative,
with quality, and tasty.**

DETAILS ON PRODUCTION CAPACITY, SEASONALITY AND OTHER CHARACTERISTICS:

The production capacity is 1500 (one thousand) jellies per month and the available flavors will be mentioned during the negotiation due to the seasonality of the edible flowers.
