

PEANUTS

COMPANY

The Agropecuária de Parapuã Cooperative - Casul was founded on March 6, 1960 by 59 coffee producers in the region, intending to add value to the cooperative members' products for sales to the market.

The Cooperative now has 11 affiliates spread throughout the states of São Paulo and Mato Grosso do Sul. These affiliates were established to better serve small and mid-sized producers with a focus on remaining close to family farming.

PRODUCTS

NCM 1202.4200

The Cooperative currently boasts around 5,000 members, mostly small and mid-sized farmers, and many of whom belong to family farms. The Cooperative also has a peanut seed treatment unit that is certified by the "Pró-Sementes" Foundation, the largest seed certifier in Brazil.

As such, we can monitor the product and ensure both its traceability and quality based on seed certification, planting, crop monitoring, the products used, harvesting, drying, processing, blanching and sale of the product.

The reliability of the product's quality is guaranteed by Casul through complete tracking in the production chain.

We have Runner peanuts in all sizes.
