

COMPANY

The Brava company was founded in 2003, in the city of Cristalina-GO. Starting its work in the commercialization of agricultural inputs, forming a new process of assistance to the producer, from the preparation of the soil to the harvest.

In 2008, in partnership with Matsuda, it also started to serve producers in the livestock sector, thus becoming a company for the marketing of agricultural products.

In 2014, we became a business and consulting company, until today we lead the fruit growing branch in Cristalina and region.

PRODUCTS

Fruit growing is the newest economic activity in the region, and it has been growing constantly. A great factor for production is the climate that allows to grow fruits of adapted species as well as apple, grape, peach, plum, nectarine among others. And Brava has a very important role in

this growth, encouraging producers and providing them with all the necessary assistance, with quality technical assistance, processing unit and also marketing.

The project consists in bringing the producer closer to the final consumer, assuming the main difficulty of the producers, the "Processing and Marketing". Thus, achieving better prices, without the interference of middlemen and with the quality that the final consumer demands.
