# HONEY AND BEE DERIVATIVES

## COMPANY

In February 1998, the agronomist Mário Calheiros de Lima founded the company Fernão Velho, in the district of Fernão Velho, in the city of Maceió, in the state of Alagoas. The company represents the realization of a dream and aims to enhance the production and marketing of Alagoas red propolis, bee honey and derivatives, in the highest quality standards.

Every product line is completely natural, without preservatives and chemical additives. We work very hard, collectivity and love, as we learn from our little bees.

## PRODUCTS

**NCM 0409.00.00**

Coming from the Alagoas mangroves, the red propolis of Alagoas has a reddish color and strong balsamic smell, it is generated from the resin of the plant "tail of Bugio", formed in the hive by the salivary action of bees, wax and pollen.

In the red propolis of Alagoas there is a complex and unique composition, because it has powerful isoflavonoids, responsible for its unique features, never before found at the same time in any other type of propolis in the world.
