PRODUCTS

NCM 0409.00.00

Pure energy and health in every detail. **Raw honey** fully preserves its enzymes, vitamins, and natural antioxidants, remaining a living food with recognized antibacterial properties and an important ally in strengthening the immune system. **Wildflower honey**, sourced from a variety of flowers, has a broad nutritional and mineral-rich profile, making it an excellent natural tonic for everyday use.

The **honey compound** strategically combines ingredients, enhancing its expectorant and antiseptic properties, making it especially suitable for relieving respiratory problems. The combination of **honey with cinnamon and turmeric** results in a powerful compound with anti-inflammatory and antioxidant action, aiding in metabolism and fighting free radicals. **Honey with dehydrated orange** combines the energy value of honey with the vitamin C content of the fruit, favoring nutrient absorption and promoting digestive well-being.

Honey with pollen stands out as a superfood, rich in protein and essential amino acids, contributing to the reduction of physical and mental fatigue.

Honey in sachets offers convenience and hygiene, making it an ideal solution for providing quick energy during busy routines or sports activities. Finally, **green propolis extract**, widely recognized as a natural antibiotic, is rich in artemillin-C and plays a key role in strengthening the immune system and protecting cells.
