

**FRUIT JUICES AND PREPARATIONS****COMPANY**

Founded in 2002 in São Luís, Maranhão, Sabor da Ilha is a family business with a tradition in the production of artisanal jams. Under the Gaia Amazon export brand, our purpose is to transform the exuberant biodiversity of the Legal Amazon into sophisticated gastronomic experiences.

We operate in the gourmet and food service market, delivering natural products that combine traditional knowledge with technological innovation. Recognized for its excellence, the company is trained by PEIEX (ApexBrasil) and selected in innovation programs such as Tecnova III, consolidating its presence in the market.

PRODUCTS**NCM 2007.99.10**

Our jams capture the essence of the Amazon with a high concentration of fruit and a clean label certification, highlighting the authentic flavor of native fruits. The portfolio highlights the characteristic tartness of cupuaçu, the smooth and velvety texture of buriti, and the distinctive creaminess of bacuri, in addition to our iconic pepper jelly, a market leader.

We use sustainable technology, recognized by the Inova Cerrado program, which preserves aromas and nutrients, guaranteeing superior quality at every stage of the process. Available in 280g, 40g (Gift) and 1.2kg (Food Service) packaging, our jams are ideal for sophisticated pairings and meet the most demanding international standards of quality and traceability.

With 24 years of experience, we combine artisanal tradition with industrial scale, maintaining meticulous recipes and expanding the versatility of our portfolio, which includes diet versions and high-value Gift packaging. The company was selected in the Tecnova III and Inova Cerrado calls for proposals, reinforcing our commitment to technological innovation, sustainability, and excellence in every product.

**DETAILS ON PRODUCTION CAPACITY, SEASONALITY AND OTHER CHARACTERISTICS:**

Current demand is 7 tons per month, while installed production capacity is 10 tons per month. There is an expansion plan foreseen for 2027, with an increase in capacity to 60 tons per month. The shelf life of the products varies between 12 and 24 months.
