Cultivando com Cuidado

FRUIT AND VEGETABLES

COMPANY

The history of Rasip Agro originates from the entrepreneurial vision of its founder, Mr. Raul Anselmo Randon, who began investing in fruit farming in the region of Vacaria (RS) in the 1970s. Since then, the former Rasip built a solid track record in the production and commercialization of apples, evolving into the current Rasip Agro.

With over four decades of experience, the company's purpose is to cultivate with care, combining quality, innovation, and responsibility in all stages of production. Today, its apples are present in the Brazilian market and in various international markets.

PRODUCTS

NCM 0808.10.00

Rasip Agro produces and commercializes high-quality apples, Gala and Fuji varieties, with special emphasis on Rasip Agro Belgala, developed and exclusively protected by the company in the market. Production combines experience in fruit farming, technical management, and careful control of the harvest point, aiming to ensure standards of color, flavor, texture, and preservation. Among the main differentiators are production traceability, internationally recognized certifications, use of technologies in the field, and rigorous quality control. The company also continuously invests in orchard modernization, sustainability, and the development of solutions that add value to the product and the consumer experience.

Excellence in production: specialized technical management, orchard modernization, and attention to the ideal harvest point, ensuring greater standardization and quality of apples. Traceability and safety: controlled processes throughout the production chain, combined with internationally recognized certifications, ensuring reliability for clients and consumers. Innovation and differentiation: continuous development of new technologies, packaging, and product value-adding strategies, in addition to a structure prepared to serve different client profiles in national and international markets.

DETAILS ON PRODUCTION CAPACITY, SEASONALITY AND OTHER CHARACTERISTICS:

Annual production in 2026 of 65 thousand tons of apples, 50 thousand tons of CA/DA storage, and 1,300 hectares of orchards.
