

FRUIT AND VEGETABLES

COMPANY

Desfrutare was born from a passion for life in the countryside and transformed that purpose into a company focused on the production and marketing of dried coconut for the international market. We operate with excellence, responsibility, and global quality standards, showcasing the productive potential of our region to the world.

With a management style driven by sustainability and positive impact, Desfrutare combines rural tradition, social responsibility, and strategic vision. We create jobs, strengthen the community, support environmental and social causes, and adopt responsible production practices. Our distinguishing features lie in sustainable production, social commitment, internationally recognized quality, and purpose-driven origins, because for us, production is about cultivating trust and shared prosperity.

PRODUCTS

NCM 0801.11.00

Dried coconut is a strategic product in the global food and derivatives chain, widely used as a raw material in various sectors, such as the food industry, cosmetics and natural products, vegetable oil production, and ingredients for confectionery, baking, and vegan and

functional food lines. Recognized worldwide for its nutritional value, high fiber content, and excellent energy supply, coconut stands out for its versatility and growing demand in national and international markets.

Originating in Brazil and with a strong agricultural identity, Desfrutare's dried coconut is produced with a focus on sustainability and environmental responsibility. The company adopts rigorous selection criteria to guarantee uniformity, high pulp yield, and a suitable standard for export, ensuring a 100% natural product with a resistant peel, ideal for industrial processing.

Combining social commitment, traceability, and logistics prepared for international trade, Desfrutare delivers to the international market not only dried coconut, but also consistency, quality, and security of supply.

DETAILS ON PRODUCTION CAPACITY, SEASONALITY AND OTHER CHARACTERISTICS:

The established monthly target is 15,000 kg, a volume set below the usual production capacity out of caution and responsibility, considering that this is the first export process.
