

# HONEY AND BEE DERIVATIVES

## COMPANY

Since 1982, the Breyer family has played a key role in the production, education and research of honey, propolis and derivatives of bee products.

Since 1999, the SEIVA DA NATUREZA PRODUTOS NATURAIS brand has been founded under the leadership of Geraldo Breyer and has worked in the processing of honey and honey derivatives, taking part in national and international events on bee products organized under research projects, being the most known the one together with th UFF of Rio de Janeiro about the effect of propolis against the P-157 bacteria (hospital infection cause). The company is currently looking to expand its client base in Brazil and abroad.

## PRODUCTS

NCM 0409.00.00

Honey is a noble food and should be consumed every day. In some cultures it is even associated with longevity. In addition to being an excellent food supplement, it can be used as a sweetener in fruit, oatmeal, milk, toast, cakes and in various sweet and savory recipes.

Honey is a food produced from the nectar of flowers and processed by the bees' digestive enzymes. It has been used since ancient times as a sweetener in recipes and also for its medicinal properties. It is rich in sugars (glucose and fructose) and carbohydrates, making it a good source of energy.

## DETAILS ON PRODUCTION CAPACITY, SEASONALITY AND OTHER CHARACTERISTICS:

Mel Flor de Ouro honey is 100% natural and comes from rational beekeeping, where we preserve and increase the number of bees on the planet. Our purpose goes beyond the sweetness of honey, we want to preserve it so that we can always produce in balance.
