

APIÁRIO
ROSA DE SIRON

**HONEY AND
BEE DERIVATIVES**

COMPANY

The Rosa de Saron Apiary began its activities in the 1990s in the municipality of Imbituba in Santa Catarina, by beekeeper Amarildo de Souza.

In the beginning there were just a few hives and a small honey extraction house, but with determination to improve our beekeeping activities we launched the Apiário Rosa de Saron brand with honey and honey products on the Santa Catarina market.

In its quest to preserve nature in order to obtain the purest honey, the Rosa de Saron Apiary has progressed to the present day. One of our main achievements in 2020 was the implementation of the SIF 5070 seal (Federal Inspection Service), with the aim of guaranteeing the safety and origin of animal products.
