**A MELHOR POLPA!**

**FRUIT JUICES AND PREPARATIONS**

## COMPANY

Since 1995, Nordeste Fruit has stood out for its quality and innovation in the production of fruit pulp, frozen fruit, frozen cassava and açai. With decades of experience, the company is committed to high quality products, prioritizing healthiness, practicality and food safety through modern and rigorously controlled processes.

Today, Nordeste Fruit is a benchmark in its sector, serving supermarkets, wholesalers, industrial kitchens, restaurants, hotels, hospitals and distributors. It has a specialized team, modern manufacturing facilities and its own laboratory, guaranteeing excellence from the selection of raw materials to after-sales service.

## PRODUCTS

**NCM 2008.99.00**

Nordeste Fruit produces 100% natural tropical fruit pulps, made from rigorously selected fruits such as mango, pineapple and passion fruit. The technological process applied preserves the fruit's original characteristics, guaranteeing a creamy texture, intense flavor and high nutritional value, resulting in a true natural puree. With quality control and food safety, the pulps are ideal for industrial and gastronomic applications that require standardized, practical and high-performance ingredients.

The pulps are pasteurized, providing greater stability, without the use of preservatives, ensuring the authenticity and safety of the product.

Combining robust production capacity, efficient logistics and complete traceability, Nordeste Fruit ensures continuous supply and compliance with the main international standards. In this way, the company positions itself as a reliable partner for buyers looking for premium natural ingredients for their products and operations on the national and international markets.

### DETAILS ON PRODUCTION CAPACITY, SEASONALITY AND OTHER CHARACTERISTICS:

The company has an installed production capacity of 300 tons per month for processing tropical fruit pulp, ensuring a constant supply and logistical efficiency to meet orders of different sizes and markets. This robust production structure makes it possible to meet deadlines safely, maintain homogeneous quality standards and adjust volumes according to importer demand, favoring more strategic negotiations.
