

HONEY AND BEE DERIVATIVES

COMPANY

Founded in 1991, Conap - National Beekeeping Cooperative is a traditional Brazilian cooperative of honey and bee derivatives, and exports its products to several countries. Our cooperated beekeepers supply the green propolis and honey for manufacturing our products. Conap is committed to the environment and its products are fully traceable.

Cooperativism is a valuable tool for mobilizing, organizing and valuing human beings and their work. When well-practiced, with responsibility, professionalism and participation.

PRODUCTS

Honey and bee derivatives are natural products used as food or for preventive and curative medicinal purposes. Propolis extract is antiseptic, antibacterial, antiviral and natural antibiotic, it is manufactured from the raw green propolis and alcohol cereals. It has a high content of bioflavonoids that strengthen the immune system, stimulating the body's natural defense mechanisms. They are natural products recommended to treat and prevent flu, colds, throat inflammation.
