

COMPANY

Located in Bebedouro/SP, Sodmel was founded in 2018 by a small family project. Following her passion, Diana Paula Pereira started the project, a chemistry technician with 15 years of experience in the honey and bee products commercialization market in the National and International markets.

In January 2022, the Sodmel company obtained the registration with the Ministry of Agriculture and Livestock and started the commercialization of fractionated honey for the national markets. Idealizing the possibility of conquering the international market, it started a partnership with Apex-Brasil in August 2022, participating in PEIEX - Export Qualification Program, concluding in February 2023.

PRODUCTS

NCM 0410.00.00

Vision, seeking excellence with business expansion, conquering new markets, partners, and important certifications for the development and general improvement of internal processes, ensuring product quality and safety.

Favored by the fact that it is located in a tropical country, Sodmel benefits from the production of honey from different flowerings, which occur all year round and stand out in the national and international market for being aromatic, tasty, and totally free of antibiotics. Among the products offered are orange blossom honey, grape vine honey, wild honey, quince tree honey, and eucalyptus honey.
